

Preliminary Profile Reference Sheet

Revision PR-2026-08 | Issued 12 August 2026 | English

PRELIMINARY - NOT A PRODUCTION, CAD OR INSTALLATION DRAWING. Diagrams are schematic and not to scale. Do not derive tooling, cutting, quantity, fixing spacing or site dimensions from this document.

Reference	Nominal envelope	Schematic profile intent	Interface / coverage status	Order confirmation required
MR-WPC37-160-22-3000	160 mm overall width; 22 mm depth; 3000 mm standard reference length	Hollow fluted decorative wall-panel profile	Interlocking-edge direction; 150 mm typical planning coverage	Dimensioned cross-section, cavity geometry, edge lock, tolerances, finish and weight
MR-WVB002-1220-2440-5	1220 x 2440 x 5 mm sheet reference	Flat decorative sheet with surface film / foil system	Typical butt-joint or coordinated trim treatment; nominal 1220 mm sheet module	Core composition, layer thickness, edge treatment, adhesive/TDS and finish code
MR-MOT0326-400-8-5950	400 mm overall width; 8 mm thickness; 5950 mm standard reference length	Integrated PVC-based interior panel	Interlocking-edge direction; 400 mm typical planning coverage	Exact formulation, dimensioned joint, effective coverage, internal structure, finish and weight
MR-AC001-L-8	For nominal 8 mm panel compatibility	L-shaped edge trim	Edge finishing component; no verified slot dimensions	Alloy, face dimensions, wall thickness, length, finish and fixing
MR-AC001-T-8	For nominal 8 mm panel compatibility	T-shaped joining trim	Joining component; no verified receiving-slot dimensions	Alloy, face dimensions, wall thickness, length, finish and fixing

Project use

Use this sheet only to identify which preliminary configuration should be discussed in an inquiry. JH WPC will request or prepare the current supplier production drawing after the profile, finish, quantity and intended application are known.

Release gate

Stage	Required evidence
Quotation	Current dimensions, selected finish, order quantity, package basis and commercial terms.
Sample approval	Physical sample or rights-cleared current product sample with public finish code.
Production	Supplier-approved dimensioned drawing and signed specification.
Installation	Project-specific installation method, substrate conditions, fixing and trim coordination.
